Office Space & Living Quarters

Fabricated Washroom & Kitchen

Mobile Site / Offices-Mantrac

Semi Storage offices

 These containers are a perfect combination of the best of space utilization. A blend of office space and storage space at the same time giving you an apt solution of keeping an eye on your material while sitting in a comfortable workspace, available with either same or common entrance or with different entrances for your office and store This can be used for storage, a small site office and sleeping space for 2 people fitted with cupboards to suit your site needs

Semi-storage Units

House – Fitted with all Facilities

House Fitted with all Facilities

Transporting to Site

Bunkhouses

• A Dynamic Product from our production house! A very comfortable and secured sleeping space for all the people working at your sites in the remotest of the areas which are prone to heavy rainfall, extreme cold and extreme hot temperatures This also gives u a very efficient space utilization with sleeping/resting space for as good as 12 people within a space of 20ft by

•

 8ft with the storage space of their belongings as well just place it at your site and move it once your site is moving to a different location. This again comes with all the necessary electrical fittings like fans and tube lights.

Bunkhouses

Racked Containers

 A unique concept from SPATIAL EXPERIENCE **GROUP LIMITED!** A container joined fully from top to Bottom with slotted angles, a safe haven for all your tools/documents WE give you all the electrical fittings from the Tube lights to fans to exhaust fans. These containers are a perfect place to place your stuff away from Water-Heat and any other factor that might destroy your materials. The durability of the racks come from the roof and the floor of the container with which its joint with a series of running angles which are welded and screwed with the racks giving them toughness in the worst of the conditions

Racked Containers

Racked Container Concepts

We also offer:Container power units

'Wherever you want them'

- "A Container Converters product"
- Emergency standby power generator containers 50 kVA to 2000 kVA
- Protect your generator by taking one of our units and enclosing it inside a customized container. Their advantage is that they provide ideal operating environment, a common backup and power accessories such as circuit breakers, automatic transfer switches and fuel tanks. The rigid design of the containers protects generators from harsh weather conditions and protects from unauthorized access. The design of the emergency standby power generators also makes it easier to transport the whole system. Only the connections must be disconnected and reconnected later on site.

Options

- Base tray as collection tray with leakage oil probe for use in water protection areas
- Noise insulation up to 60 dB(A)
- Tank systems with up to 8000 l
- Connections for external fuel supply
- Inclusion into existing energy management systems of industrial companies and buildings
- Remote maintenance and positioning by means of GSM/GPS
- Load adjustment during parallel operation of several systems
- Individual gas exhaust
- Rotating beacon / working lights
- Fixed Louvers
- Automatic emergency power function
- Fuel Sensors on Control Panel
- Fuel Lines w/ Fusible Links
- Uninterrupted restoration of grid supply

Power Units

Mobile Clinics

Mobile Clinic/Laboratory

- Container converters specializes in making innovative self-contained, mobile medical clinics Which are built in shipping containers
- Our Clinics have an innovative approach to improving health care in remote areas. By building and customizing these container clinics, we seek to enable organizations to provide sustainable medical services in underdeveloped regions and disaster areas and bring hope to those who need it the most.
- Container converters mobile clinics are portable, self-contained medical clinic refurbished by our team of dedicated staff, providing an important resource for medical relief in the face of disaster or in areas with poor infrastructure.
- Our Clinics are so appealing because of their versatility and ease of use. These container clinics come in both single and multi unit configurations.
 Single unit
- A standard single unit 4oft Clinic contains two exam rooms, laboratory and mechanical room with generator and a water system. This self-contained mobile container clinic also comes with electricity/Solar and air conditioning unit in each medical room, making them usable in even the most remote areas

Multi unit Clinic

A multi unit clinic can be designed to create a **small hospital**. These clinics are typically made out of three containers and set up in a "U" shape. These clinics are very **customizable** based on the needs of the area it will be serving.

 A multi unit clinic has the options of washrooms, laboratory, pharmacy, dental rooms, optometry rooms, surgical suite and exam rooms.

Why container mobile clinics?

- Durability
- In stantready to use clinic
- Efficient and Effective way to provide medical care
- C u s t o m i z a b l e to meet a variety of medical needs
- A green solution for medical care

Quick solution

- We continue to find ways to improve the quality of our workmanship while increasing our environmental consciousness. Our mobile space utilization is both an economical solution and an innovative design to serve humanity
- SPATIAL EXPERIENCE GROUP LIMITED has provided, a mining company in Kenya (Base Titanium Kenya) and Mantrac Kenya with a practical way to avoid many of the pitfalls involved in building in remote areas, a way to make sure projects are actually completed and most importantly, a way to bring medical help that they desire to give to those who need it the most.
